Activity Report of CIS National Centre in Japan

Fumiaki Saito

Deputy Director for International Affairs

JISHA

The 10th Industrial Accident Prevention Programme (FY2003-2007)

- 1. Elimination of fatal accidents**
- 2. Ensuring occupational safety and health in small and medium-sized enterprises**
- 3. Promotion of occupational health measures corresponding increase of the mental and physical burden at work**

4. Development of safety and health management measures to reduce risk

5. Measures to meet diversification of employment form and mobilization of employment

JISHA's OSHMS Certification Services

- **In March 2003
JISHA started OSHMS certification services.**
- 1) Upon request of a workplace, JISHA evaluates:**
 - OSHMS construction level**
 - OSHMS running status**
- 2) The standards of the evaluation are based on the national guideline and the ILO OSHMS guidelines.**

3) JISHA issues an OSHMS certificate with a metal plate.

- **In this month, JISHA certificated 9 enterprises for the first time.**

The Revised Guideline for Measures against Smoking at Work (May 2003)

The new guideline recommends three things:

- 1. Installation of smoking rooms for the prevention of passive smoking**
- 2. Installation of ventilation systems which get rid of tobacco smoke and discharge smoke outside.**
- 3. To maintain airflow (more than 0.2m/s) from non-smoking area to smoking area in order to prevent the inflow of tobacco smoke and smell to non-smoking area.**
